

Felipe de Carvalho Santos

Full-Stack Django & React Developer

EXPERIENCE

Web Development Intern - Habitat Arquitetura & Construção (Architecture & Construction)

September 2025 - November 2025  [Go to the Website](#)

- Rebuilt, using Django, the company's corporate website previously made in WordPress.
- Set up an administrator panel that interacts with the SQLite database to allow the website's maintainer to update its contents with ease.
- Remade and modernized the website's UI, making Figma prototypes and building them with Bootstrap.

HONORS

10/10 Capstone Project

Developed EasyTalk, an online therapy web app, as my capstone project at Fatec Campinas and received a 10/10 grade. Watch the [presentation video](#).

Best Academic Performance

Awarded the best-performing student among my classmates in the Systems Analysis and Development course at Fatec Campinas.

PROJECTS

EasyTalk: Online Therapy Web App - Python, Django

February 2025 - December 2025 • Capstone Project for the Systems Analysis and Development degree

- Design the app's entity-relationship model and implemented it in Django.
- Developed the features of search/filtering of professionals and appointment scheduling.
- Wrote unit tests that found edge cases and bugs which had not been discovered before.
- Prototyped the UI in Figma and built it using Bootstrap.
- Received a 10/10 grade as the final project for the Systems Analysis and Development degree.

Unofficial Smash Ultimate RESTful API - Python, FastAPI

February 2026 - March 2026

- Used web scraping to obtain data from the Smash Wiki and covert it to JSON.
- Created endpoints to allow retrieval of the data obtained.
- Wrote unit tests with Pytest, reaching 100% of code coverage.
- Set up a GitHub Actions workflow to run the test suite on every push.
- Served static assets using Cloudflare R2 object storage.
- Deployed the API on Vercel.

[API Documentation](#)

My Portfolio Site - React, Next.js

March 2026 - May 2026

- Fed components with lists of typed objects to make it easy to maintain and update the site's content.
- Implemented internationalization with the next-intl library.
- Deployed the site on GitHub Pages.

SwitchBot: A Discord Bot - Python, Discord.py

August 2024 - October 2024

- Developed a Discord bot for me and my friends using Python and Discord.py.
- Used Firestore as the database for some commands, such as the one that creates stickers (figurinhas).
- Hosted the bot on Discloud.
